## EDUCATION

**Rajeev Gandhi Memorial College of Engineering and Technology**

*Bachelor of Technology in Electronics and Communication Engineering*

Nandyal, AP

*Dec. 2021 – May 2026*

## TECHNICAL SKILLS

**Languages:** Python, C programming, SQL, HTML/CSS, JAVA

**Libraries & Frameworks:** Pandas, Numpy

**Data Visualization & Database:** Tableau, Matplotlib, Power BI & SQL Server

**Tools & Platforms:** GitHub, VS Code, Jupyter Notebook

## EXPERIENCE

**Data Science Intern**

June 2025 – July 2025

*EdiGlobe*

*Remote*

- Performed data cleaning, preprocessing, and EDA on real-world datasets using Python, Pandas, NumPy, and Matplotlib to extract meaningful insights.
- Developed a full-stack web application using Flask, React, PostgreSQL and Docker to analyze GitHub data
- Explored ways to visualize GitHub collaboration in a classroom setting

**AI & Prompt Engineering**

May 2025

*Vault of Codes— Partnership with Google*

*Remote*

- Completed AI & Prompt Engineering internship at VaultofCodes, working on NLP tasks, model evaluation, and prompt optimization using Google Colab and Google platforms
- Developed mini-projects involving data preprocessing, automation workflows, and AI model experimentation using Python and ML libraries
- Skilled in Python, Google Colab, NLP basics, data handling, Git/GitHub, and analytical problem-solving.

## PROJECTS

**Sales Insights Dashboard** | *Power BI, SQL, Python (Pandas, NumPy), Excel*

*GitHub Link*

- Built interactive dashboards visualizing sales trends and customer behavior from 100K+ records.
- Achieved a 20% increase in cross-selling through market basket analysis and customer segmentation.
- The dashboard is projected to increase revenue by at least 7% in the next quarter

**Face Detection System** | *Python, OpenCV*

Sep, 2023

- Built a custom face dataset using webcam-captured images and trained an LBPH classifier to enable accurate facial recognition.
- Implemented real-time face detection and recognition with dynamic bounding-box visualization for identified faces.

**Grocery Store Management system** | *HTML, CSS, Javascript*

Nov 2025 - Present

- Developing a 3-tier Grocery Store Management System using HTML/CSS/JS, Flask, and MySQL with features like user authentication, product management, billing, and secure data handling.
- Gaining hands-on full-stack experience through API integration, backend logic design, and real-time database operations for efficient system performance.

## EXTRACURRICULAR ACTIVITIES

**Head of Sambhava** | *Student Leadership – ECE Department*

Nov, 2024– Present

- Leading the Sambhava Club, driving initiatives that promote startup innovation, technical growth, and entrepreneurial mindset among students.
- Created an educational e-commerce platform that connects students with backlogs to peer tutors, enabling knowledge sharing and a student-to-student earning model

## ACHIEVEMENTS

- Secured a perfect 1000/1000 in AWS Cloud Practitioner Certification, showcasing exceptional understanding of AWS services and dedication to skill advancement.
